

Snap-In Filter

Helps Keep Leaves and Debris Out of Gutters.

- Install in seconds by snapping on to front edge of gutter.
- Handy 3 foot sections fit standard "K" style aluminum, steel or plastic gutters.
- Made of high quality, rigid PVC.
- Snap-In design will not collapse under debris.
- 50 guards needed for average home.
- Available in white or brown (Fits 4", 5" & 6" Gutters).

Installation

Simple.

Simply slides under the shingles and hooks to the front edge of the gutter. No special tools required.

Gutter guards

are installed on rain gutters to help prevent leaves, twigs and other debris from falling into the gutters and clogging both the gutters and downspouts.

Obstructed gutters and downspouts will prevent rain water and melting snow from flowing through the gutter system.

Water that cannot flow freely can back-up and overflow the gutter causing damage to the landscaping and the foundation.

Damage to the roof line and the fascia board may also occur if water gets behind the gutter.

Installation Instructions for Amerimax Home Products Inc.

Periodic cleaning to remove excessive debris may be required for all gutter guards.

3' Snap-in Gutter Guards 3' Snap-in Gutter Guards with filters Fits 4", 5", 6" Metal Gutters

Install the 3' Snap-in Gutter Guards with label side up, clip to front lip of gutter and slide back side under the roof shingle. Be sure to install the high projection, lip side up, which will act to baffle roof run off and help direct into the gutter.

Install the 3' Snap-in Gutter Guards with filter, filter side up.

*In high wind areas, use two sheet metal screws per piece, secure to the front lip of the gutter.
