

Gutter Assembly

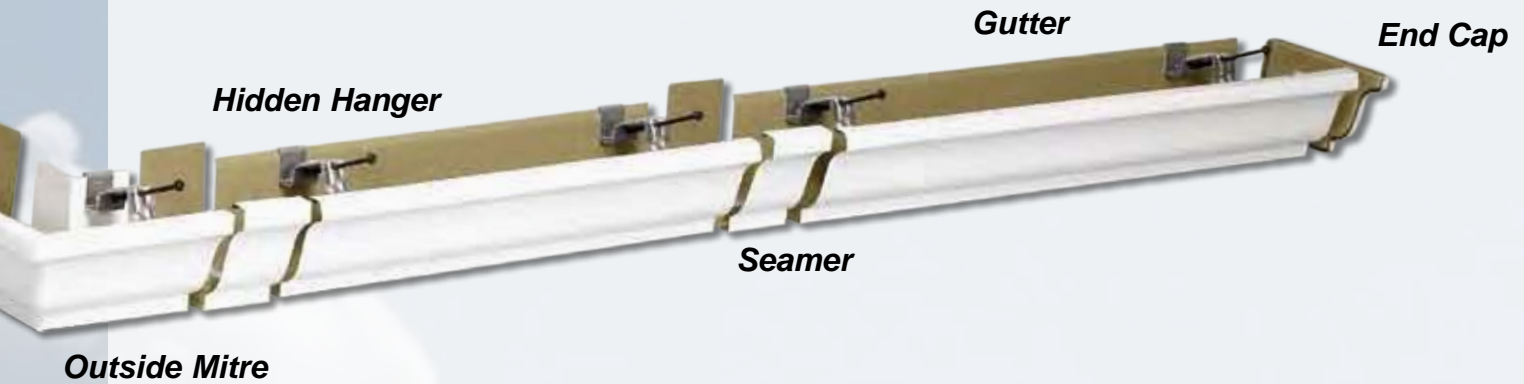

Gutter Facts You Should Know Before Purchasing Your Roof Drainage Systems

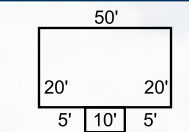

- 2" round downspout drains 75 gallons a minute
- Standard size or 2 x 3 downspouts drains 186 gallons a minute
- Commercial size or 3 x 4 downspouts drains 434 gallons per minute
- 5" gutter systems can use 2 x 3 and 3 x 4 downspouts
- 6" gutter systems use 3 x 4 downspouts
- Another way to increase gutter capacity is to add more downspouts.
- Increasing size of downspouts or number of downspouts are excellent recommendations for wide roof areas, heavy downpour areas, and for gutter systems that overflow.
